Melting machine

Melting machine

Description:

The melting machine is designed to melt briquettes of oil, fats, mix them and maintain temperature.

Features:

- Stainless steel container with hot term water storage, insulation of the inner walls of the container with thermal insulation material and a stirrer with an upper drive device.
- Butterfly valve for release of product.
- Ball valve for supplying (draining) water.
- Speed of rotation of the mixer - unregulated

Melting machine

Technical Specification:

Estimated tank volume, liters:	2 000
Mixer rotation speed, revolutions per minute:	47
Drive power of the gearmotor, kW:	0,55

This product can be manufactured according to the technical specifications of the customer, taking into account its predetermined parameters and features.

Food Machinery

Machinery for tires, rubber, plastics manufacturing

Modernization and automation of production

Non-standart equipment

Production of spare parts, components, assemblies

**Outsourcing services - repair and maintenance of
equipment**

Global engineering solutions
